SOFTWARE ENGINEERING EXPERIENCE

Software Engineer Apprentice   **Salt Lake City, UT**
DevPoint Labs   **August 2021 - October 2021**
- Spearheaded group project assignments by simulating an agile work environment to maintain high levels of productivity.
- Gained valuable programming skills during lectures to implement into real world projects.
- Collaborated with peers during daily sessions and helped others understand concepts they may have been struggling with.

Signup Form | Javascript, HTML, CSS   Live Site | GitHub Repo
- Wrote form validation using vanilla Javascript and CSS to practice design and layout skills.

Floppy Potatoes | React on Rails stack, PostgreSQL   Live site | GitHub Repo
- Designed a movie review application to help solidify working knowledge of CRUD functionality.
- Engineered the frontend using React and CSS to utilize React hooks and state management.

Potluck Planner | React on Rails stack, PostgreSQL | GitHub Repo
- Teamed up with bootcamp classmates to create an application that organizes special events.
- Built an API using Axios to exchange data between the client and server and implemented user authentication.
- Implemented a PostgreSQL database to interconnect items to their specific event.

ADDITIONAL EXPERIENCE

Compounding Pharmacy Technician   Salt Lake City, UT
University Pharmacy   May 2007 - Present
- Assisted in the formulation and development of compounded medications and analyzed the final product for quality.
- Trained and guided other technicians in order to improve multitasking performance.
